HIGH
LIGHT
YOUR
TASTE

LIGHT IS OUR PASSION

Lighting can create orientation, attract attention to products and arouse interest. Lighting fascinates because it is able in different ways to encourage us to buy. And exactly that is what has been motivating us and driving us for more than 30 years. Our special field: retail areas.

As a member of the Trilux Group we are a full-range supplier: besides the scene setting in the sales area we are able to competently and economically illuminate all of the adjacent areas inside or outside of the building.

FRESH FOOD NEEDS SPECIAL LIGHT COLOURS

Light is individually adapted to the respective product range.

The demands made on the presentation of food are as varied as the products themselves. Whether it's the product range, cosmetics or wine department, we offer individual lighting solutions for every product segment. Also our special light colours for the fresh food sector brings a freshness you can see into your market.

LIGHTING ADVICE – OUR SERVICE FOR YOU

- 1 Lighting analysis**
Detailed analysis on efficiency, colour rendition, light distribution, customer guidance, lighting experience as well as cost saving
- 2 Lighting concept**
Preparation of a customized lighting concept in accordance with a jointly developed target
- 3 Sampling**
Assessment of the lighting quality on site or in our showroom
- 4 Lighting planning**
Preparation of lighting plans for exact positioning of the luminaires. International rollout easy to implement
- 5 The finishing touches**
Adjustment of the luminaires or also training of your merchandiser team so that the lighting becomes a scenario

SERVICE TOPICS BEYOND LIGHTING

Monitoring service

A look at the whole lighting system. Cloud-connected luminaires provide transparency.

- Process optimization: transparency of the energy costs optimizes processes and customer business
- Predictive maintenance reduces maintenance costs and yields reliability

After-sales services

Lighting technology support

- on request annual maintenance
- readjustment of the spotlights and replacement of components including maintenance report

Lighting control

Customized programming of lighting and event scenes on the sales floor

Lighting as a service

Leasing instead of buying your LED lighting

- Balance sheet-neutral implementation of lighting projects without any investment of one's own: more flexibility by protection of equity capital
- Cost coverage for a new lighting solution often from the first day as a result of savings in the operating costs
